Experience

McBird Technologies Pvt Ltd

Designation: Software Engineer
Duration: October 2022 – April 2023
Project: SafetyNet
An application for insurance-based companies to handle the data of their clients regarding their requirements, plan, and utility.
Responsibility:

- Build the application using ReactJS.
- Work closely with backend developers for API testing and integration.
- Convert HTML boilerplate into functional ReactJS application.
- Test and resolve bugs and responsive issues.

FashionTV

Designation: Web Developer
Duration: May 2021 – May 2022
Project: FashionTV websites
Developing responsive websites entirely from scratch was my role at FashionTV as a web developer.
Responsibility:

- Build responsive websites using HTML, CSS, and JavaScript.
- Coordinate with UX design team for website design.
- Handle GoDaddy server which hold more than 50 websites and 100GB+ company data.
- Resolve responsive issue in older websites.
- Introduce ReactJS in forth coming projects.

Projects

- Portfolio 🔗
  You can find a glimpse of my work, career, experience, and the projects that I have worked on in my portfolio website.

- The Night Suit Co 🔗
  An ecommerce website of women nightwear company. I developed the user interface using ReactJS and used NodeJS and ExpressJS for backend.

- Multistep form 🔗
  This is my personal MERN stack development project to sharpen my backend skills.

- Sayba Group [link]

  A web application for the well-known developers in North East Mumbai, Sayba Group. A platform where they can showcase their projects and developments.
